Languages: Java, JavaScript, TypeScript, HTML, CSS
Technologies / Libraries: Unix, Git, Node.js, React, Angular, jQuery, Codeship
Worked With: Scrum, AWS, Swift, Xcode, SQL and noSQL database managing, Stripe API

PROFESSIONAL EXPERIENCE

Junior Web Developer | UC Santa Cruz   October 2015 - December 2017
- Developed the Financial Affairs web platform by creating and documenting reusable functions and features for our front end developers to implement
- Reduced paper use by building a custom form validation feature to introduce online web forms

Web Developer & Governing Board Member | KZSC Santa Cruz   June 2017 - Current
- Organized a web team for the university's student run radio station by designing a modern website, standardizing code, and documenting features using React JS, AWS, Node, and integrating APIs

Full Stack Web Developer | Orion Solutions Group   September 2017 - March 2018
- Redesigned the website by analyzing important features and identifying effective page layouts to produce a contemporary platform for Orion's services

Comparative Programming Languages Tutor | UC Santa Cruz   September 2017 - December 2017
- Facilitated a collaborative learning environment for 10 students 4 times a week, resulting in the student's gaining a better understanding of different programming languages including Scheme, Ocaml, Smalltalk, and Prolog

CLASS PROJECTS

MixIn | Website   Winter 2017
- Headed a group of 6 in which I was the Product Owner for a web application built with Python over the course of 10 weeks working in an agile environment

Pronzo | iOS Application   Spring 2017
- Coordinated a group of 5 as Scrum Master by managing the group's documentation, coding standards, Sprint Plans, and Sprint Reports to complete features within the course time constraints
